

Hello!

Welcome to Operation Clean Sweep® (OCS)! Thank you for your support to help prevent pellet losses entering the aquatic and marine environment. You are now an official OCS signatory. From now on, the name of your company will appear on the OCS website [here](#).

What are the next steps now?

The "[The OCS solution](#)" page under the OCS website provides you with a number of tools which will support you with the implementation of effective pellet containment measures according to your specific needs. You can find technical guidelines on OCS implementation in the [OCS Manual](#). Please feel free to adapt and use the customizable checklists for managers and employees in your facility.

By ensuring broad awareness we can persuade more companies to join our efforts towards zero pellet loss! Feel free to use the OCS promotion materials in your communication with your value chain partners to express your commitment and encourage them to join the initiative!
